Accelerating Innovation

Safe Harbor Statement & Disclaimers

This presentation contains forward-looking statements that are subject to many risk and uncertainties. Forward-looking statements include statements regarding our intentions, beliefs, projections, outlook, analyses or current expectations concerning, among other things, our ongoing and planned product development; our intellectual property position; our ability to develop commercial functions; expectations regarding project launch and revenue; our results of operations, cash needs, spending, financial condition, liquidity, prospects, growth and strategies; the industry in which we operate; and the trends that may affect the industry or us. Although we believe we have a reasonable basis for each forward-looking statement, we caution you that forward looking statements are not guarantees of future performance.

Actual results may differ materially from those indicated by these forward-looking statements as a result of various important factors, as well as those risks more fully discussed in the section entitled "Risk Factors" in the Company's Annual Report on Form 10-K for the year ended December 31, 2021, that was filed with the U.S. Securities and Exchange Commission on March 25, 2021 as well as discussions of potential risk, uncertainties, and other important factors in the Company's subsequent filings with the U.S. Securities and Exchange Commission. All such statements speak only as of the date made, and the Company undertakes no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

This Presentation includes certain projections and forward-looking statements provided by the Company, including with respect to the anticipated future performance of the Company, and our ability to develop and commercialize products and obtain regulatory approvals. Such projections and forward-looking statements reflect various assumptions of management, and are subject to significant business, regulatory, economic and competitive uncertainties and contingencies, many of which are beyond the control of the Company. Accordingly, there can be no assurance that such projections or forward-looking statements will be realized. Actual results may vary from anticipated results and such variations may be material. Therefore, you should not rely on any of these projections or forward-looking statements. Important factors that could cause our actual results to differ materially from those indicated in the projections or forward-looking statements include, among others: (i) risks associated with the regulatory approval process; (ii) our ability to enter strategic relationships for development or commercialization of our products; (iii) patents may not issue from our patent applications, patents that have issued may not be enforceable, or additional intellectual property licenses from third parties may be required; (iv) our ability to obtain sufficient financing; and (v) our ability to consummate on terms that are favorable to us or at all any potential strategic

transactions. Any projection or forward-looking statement made by us in this Presentation is based only on information currently available to us and speaks only as of the date on which it is made. We undertake no obligation to update any projection or forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of new information, future developments or otherwise.

Asset #1: AditxtScore[™]

Opportunity

We must monitor our immune status to make more informed and timely health decision

- Everyone’s immune system is unique and responds differently to viruses, bacterial antigens, peptides, drugs, bone marrow, solid organ transplants and cancer
- By measuring and monitoring each individual’s immune system, it unlocks a new universe of maintaining and treating our immune health. This is precision made possible.

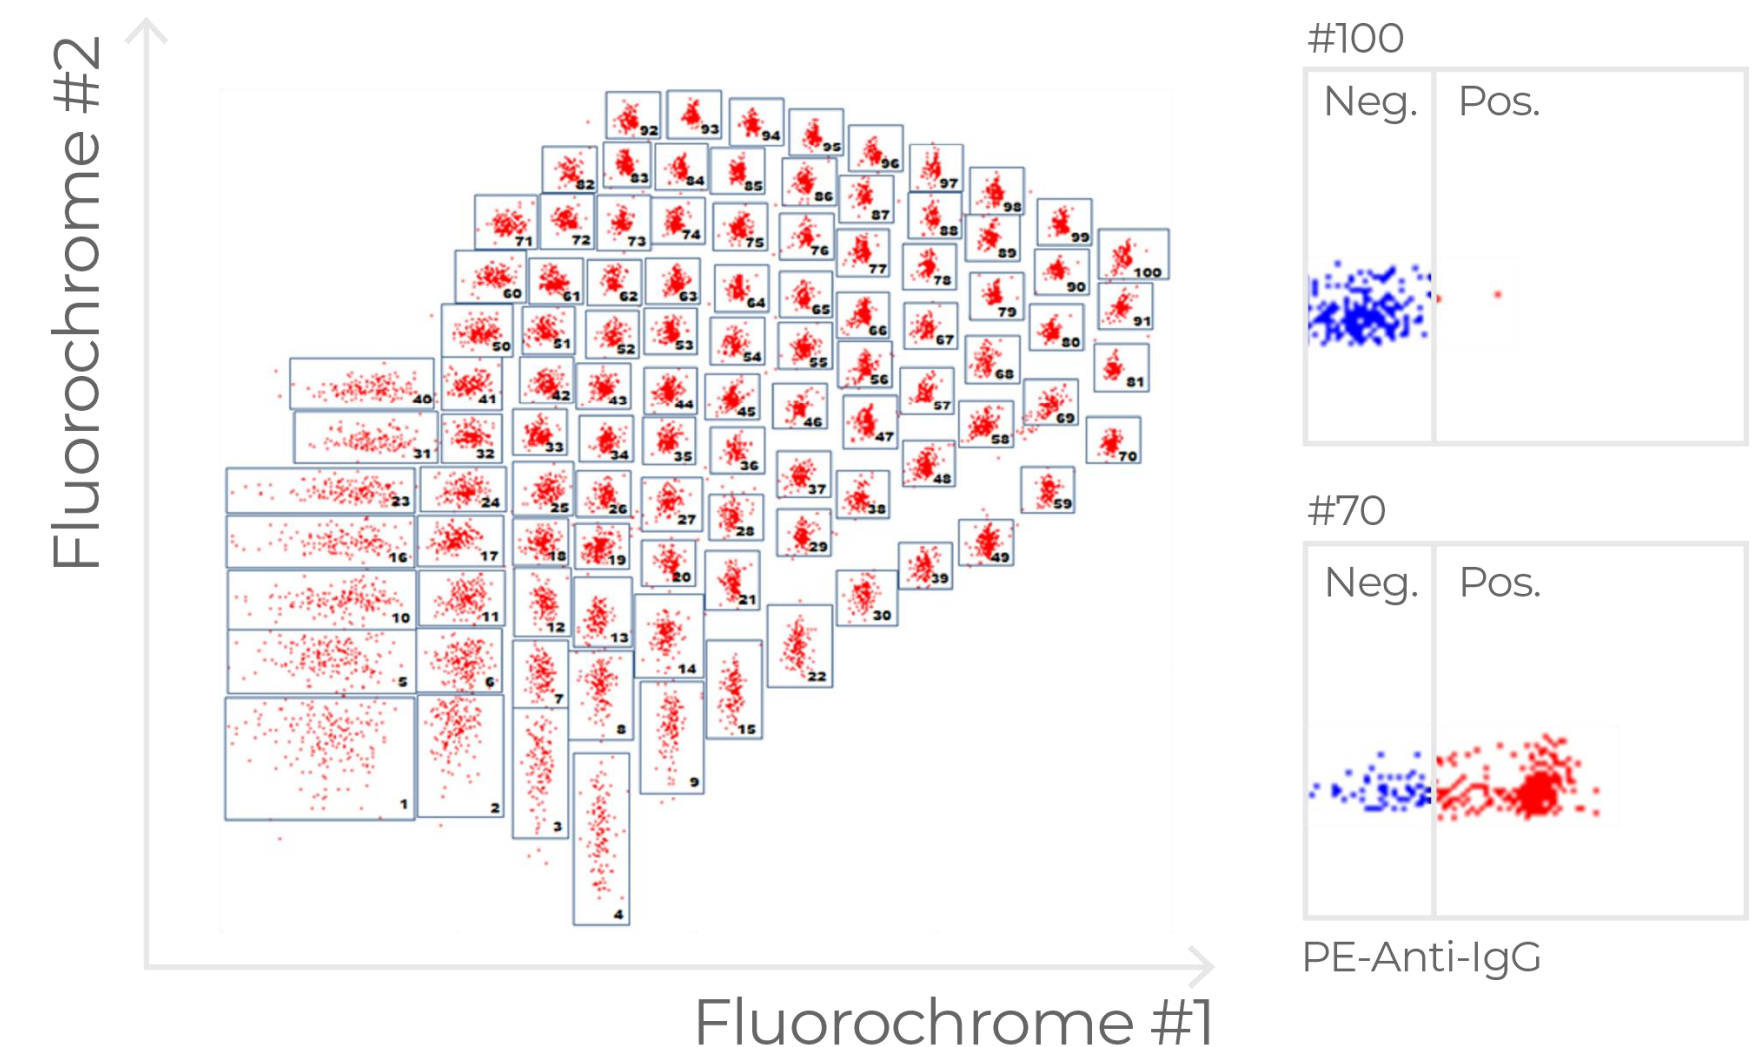

AditxtScore™: Immune Monitoring Platform

- A proprietary platform for comprehensive profiles of any individual's immune system – monitors reactions to viruses, bacteria, allergens and transplanted organs.
- Can anticipate attacks on the body and determine potential responses, guiding a plan to manage the condition or neutralize the pathogen
- Initial technology was licensed from Stanford University. It encompasses methods, systems and kits for detection and measurement of specific immune responses.
- AditxtScore™ technologies are protected by two patent families
- Substantial know-how and trade secrets in development and commercialization

AditxtScore™ Cellular Immunity Assessment Evaluation of memory B cell response (v. 2.0)

- Can detect 100 different targets
- Four-hour assay
- Sensitivity = 1 / 10⁶ cells

Chen G, Liu H, Tyan D. FlowSpot: Real time prediction and monitoring of cellular immune profiles for responses to pathogens, vaccines, therapeutics, and transplantation. Manuscript submitted for publication.

Immune Monitoring for COVID-19*

- Is there evidence of an active SARS-CoV-2 infection? **NO**
- Is there evidence of prior exposure to the SARS-CoV-2 virus or vaccine? **NO**
- Is there evidence of a robust immune response that may protect against COVID-19 infection? **NO**

* This report represents a snapshot of your current immune status and may change over time. We recommend regular monitoring of your immunity status every 3-6 months

COVID-19 Antigen

	Undetected	Detected	Previous Results 11/02/2021
SARS-CoV-2 (RT-PCR)	Undetected	Detected	Undetected

Antibodies directed against different SARS-CoV-2 antigen

	Undetected	Detected	Previous Results 09/02/2021
Anti-SARS-CoV-2 - RBD IgG (AU/ml)	318	>1600	167

#3 Commercialization

- For the quarter ended March 31, 2022 Aditxt recognized \$210,279 of revenue compared to \$105,034 in the year ended December 31, 2021.

Asset #2:

Adimune[™]

Opportunity

Modulating the immune system to address autoimmunity, organ rejection, and allergies

Immune Modulation: Our Platform

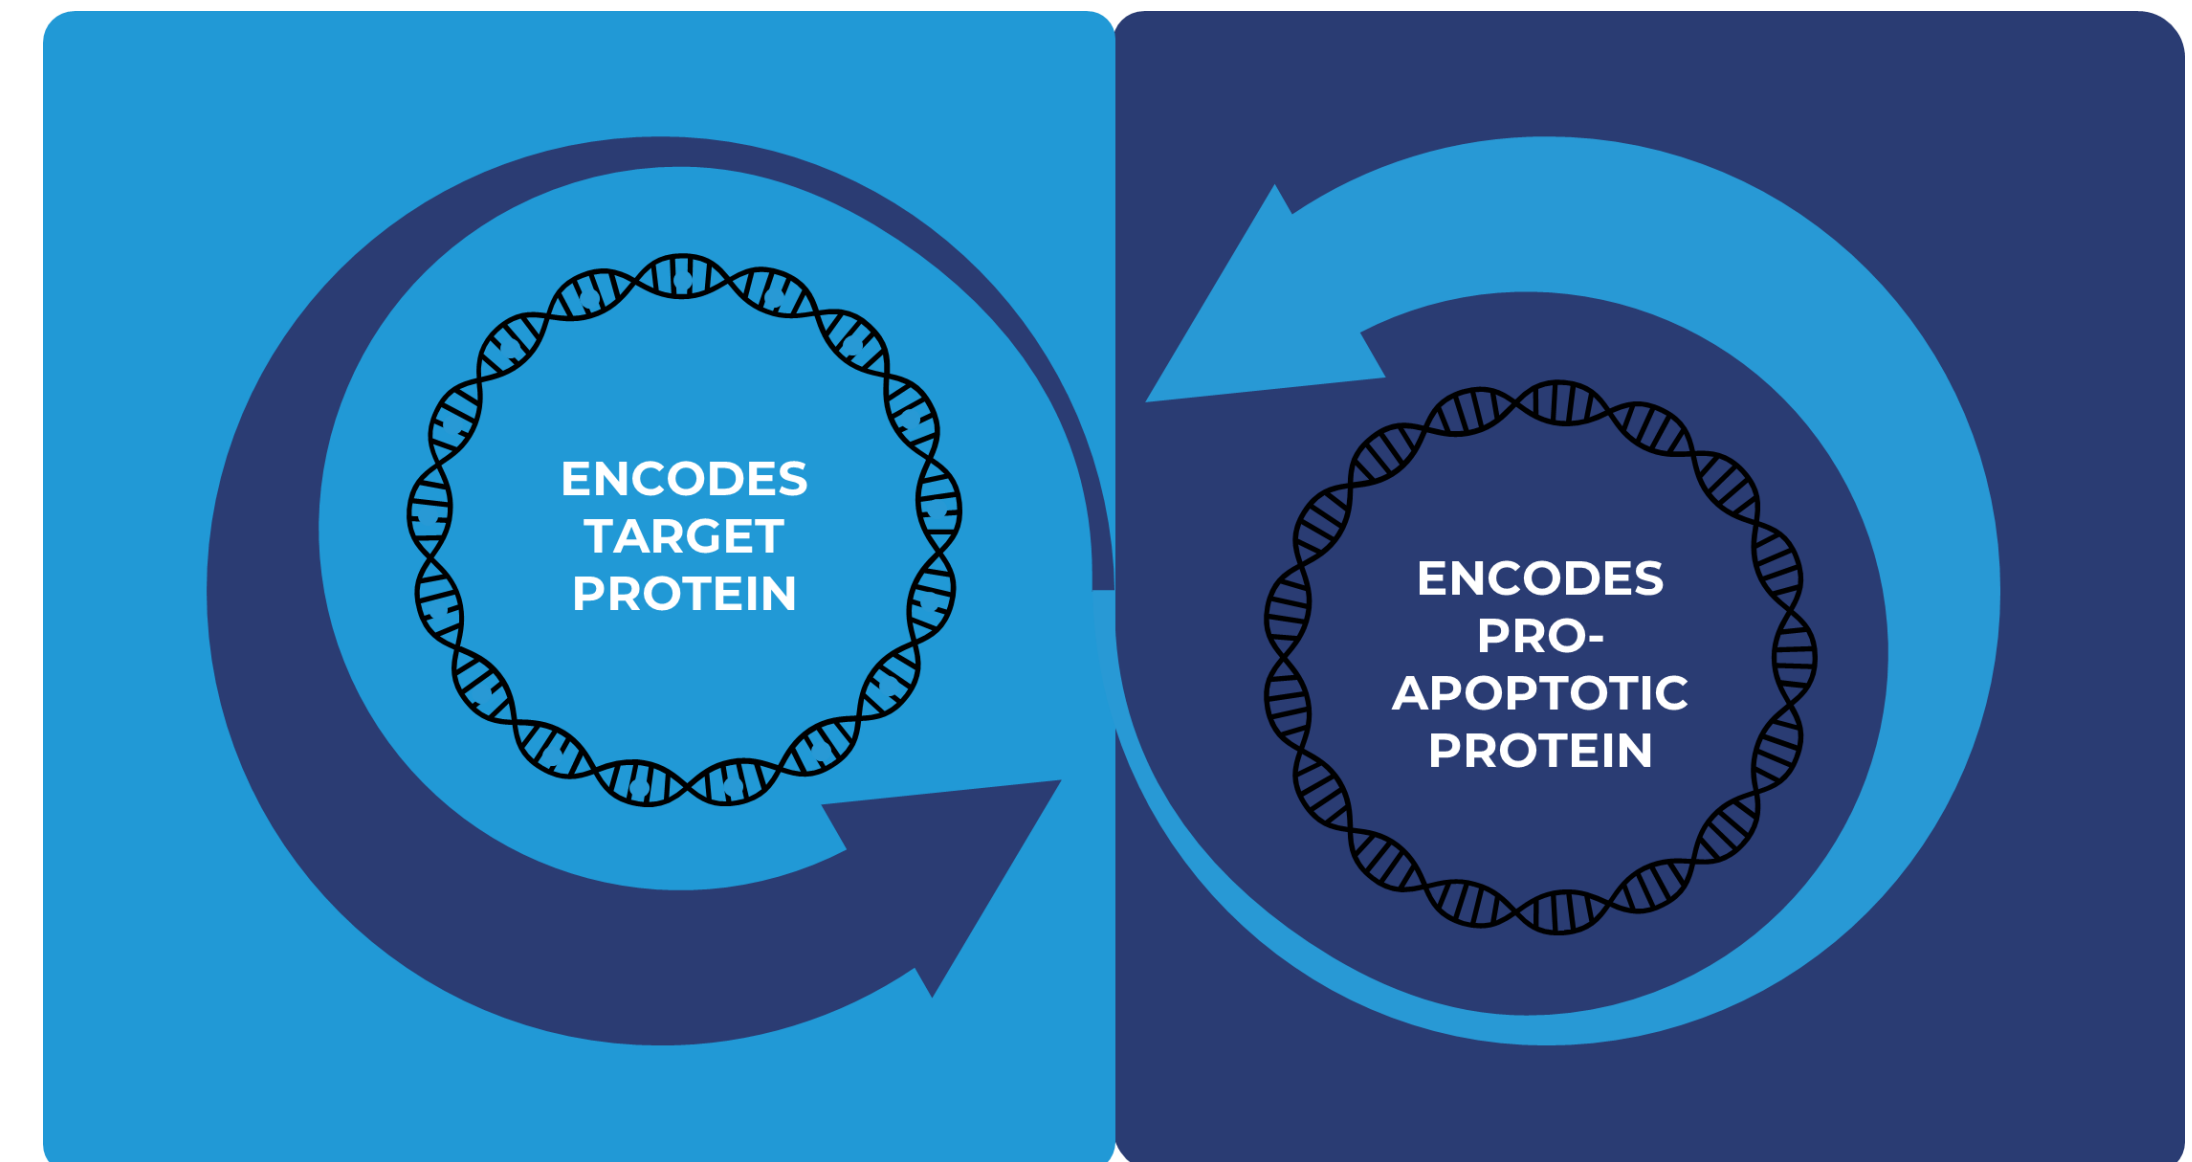

Technologies protected by 7 patent families:

- 8 U.S. patents, 4 U.S. pending applications, 86 foreign patents, and 14 foreign pending applications (EU, Australia, Canada, Japan, China, India, Hong Kong)

Patents categorized into 3 groups

- Autoimmune diseases and type 1 diabetes
- Prevention of immune activation
- Delivery systems for antigens

We also possess and in-license substantial know-how and trade secrets for development and commercialization, including related manufacturing processes and technologies.

Plasmid DNA inducing **tolerance-inducing** target protein

Plasmid DNA inducing **natural 'programmed'** cell death

#1 Innovation

Psoriasis

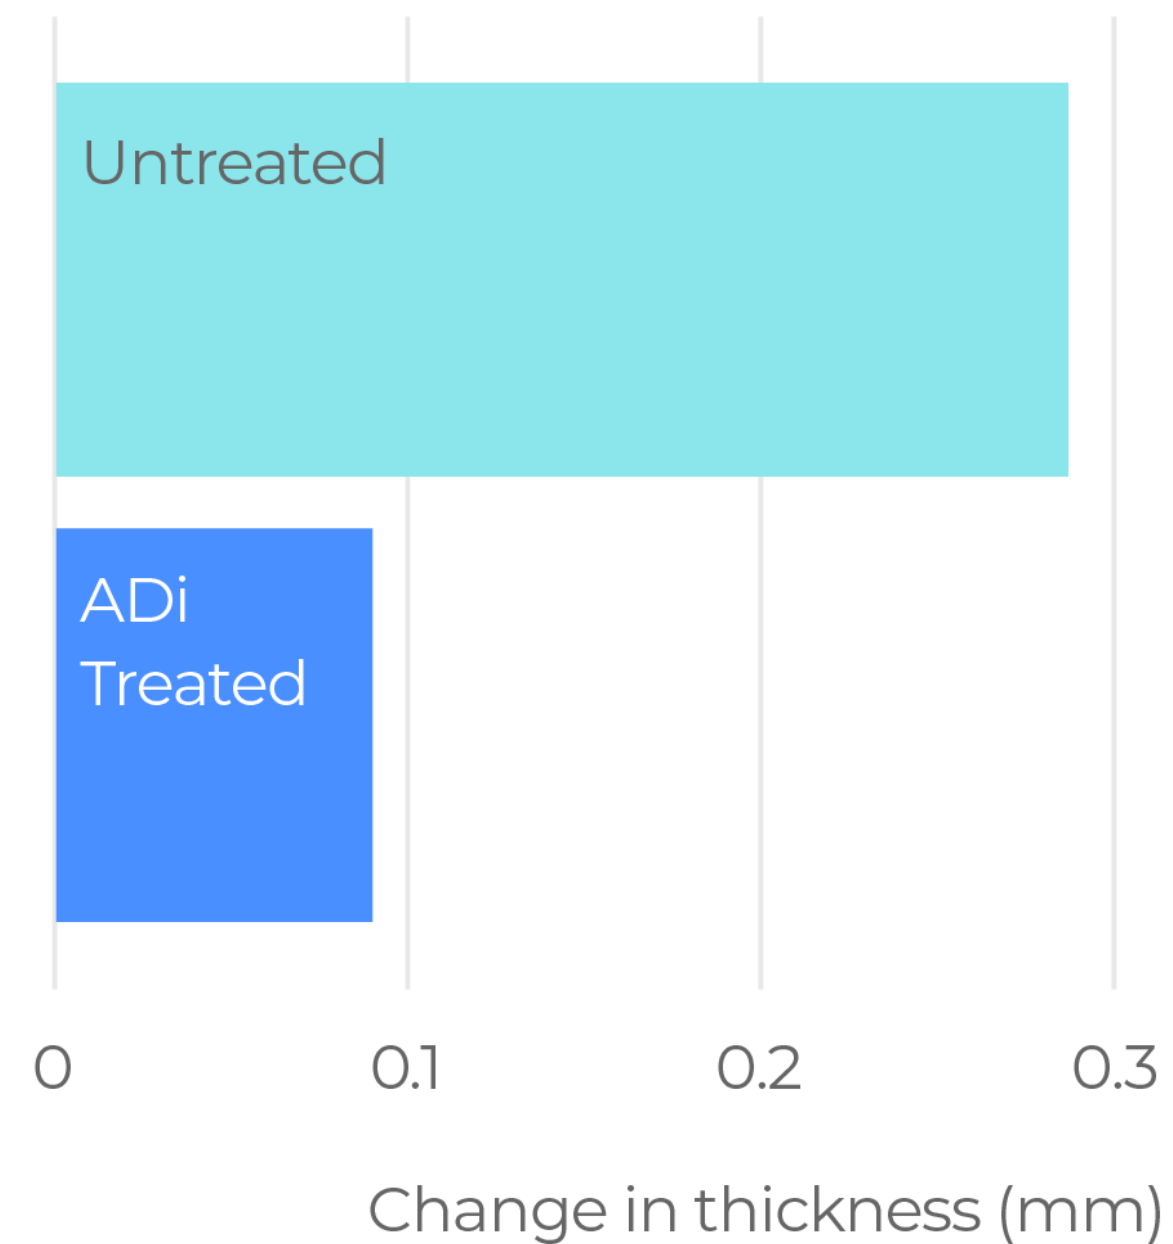

What is it?

Caused when the immune system attacks skin cells, triggering fast production of replacements leading to patches of build-up, psoriasis is often distressing and uncomfortable. It can also reduce life expectancy.

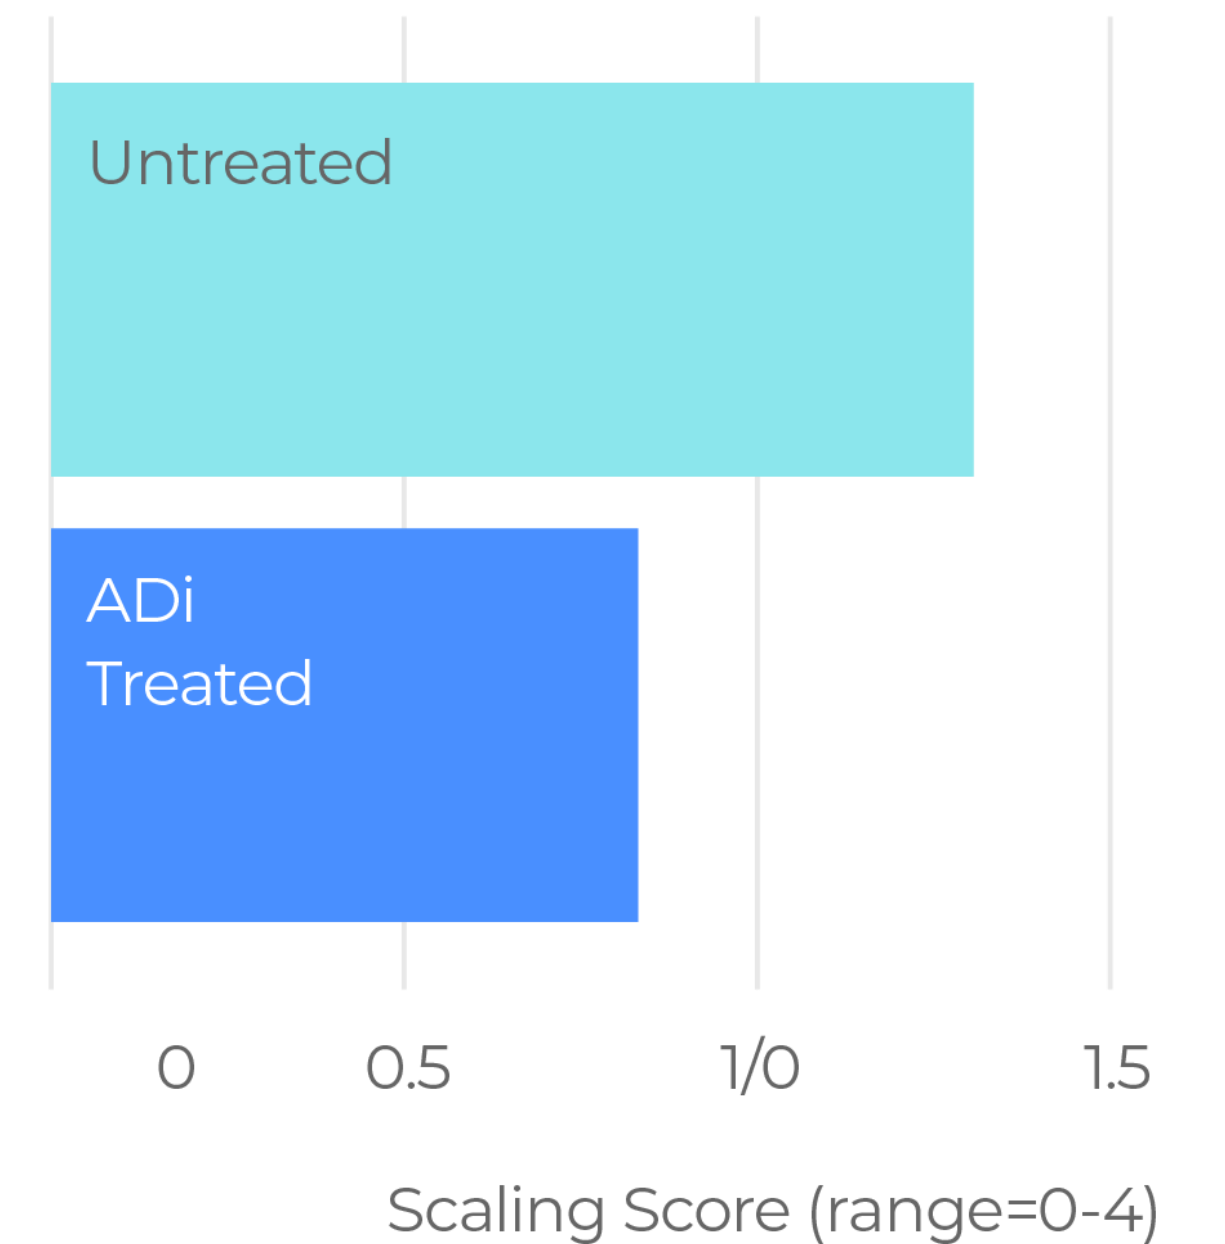

Our treatment

Aditxt's solution aims to prevent the immune system attacks, dealing with the cause of skin cell build-ups at their root. Our treatment reduced skin thickening by 69% and scaling by 38% over a 10-day study period in an established psoriasis model.

Increase in Skin Thickness
Psoriasis Induced

Increase in Scaling
Psoriasis Induced

#1 Innovation

Type 1 Diabetes

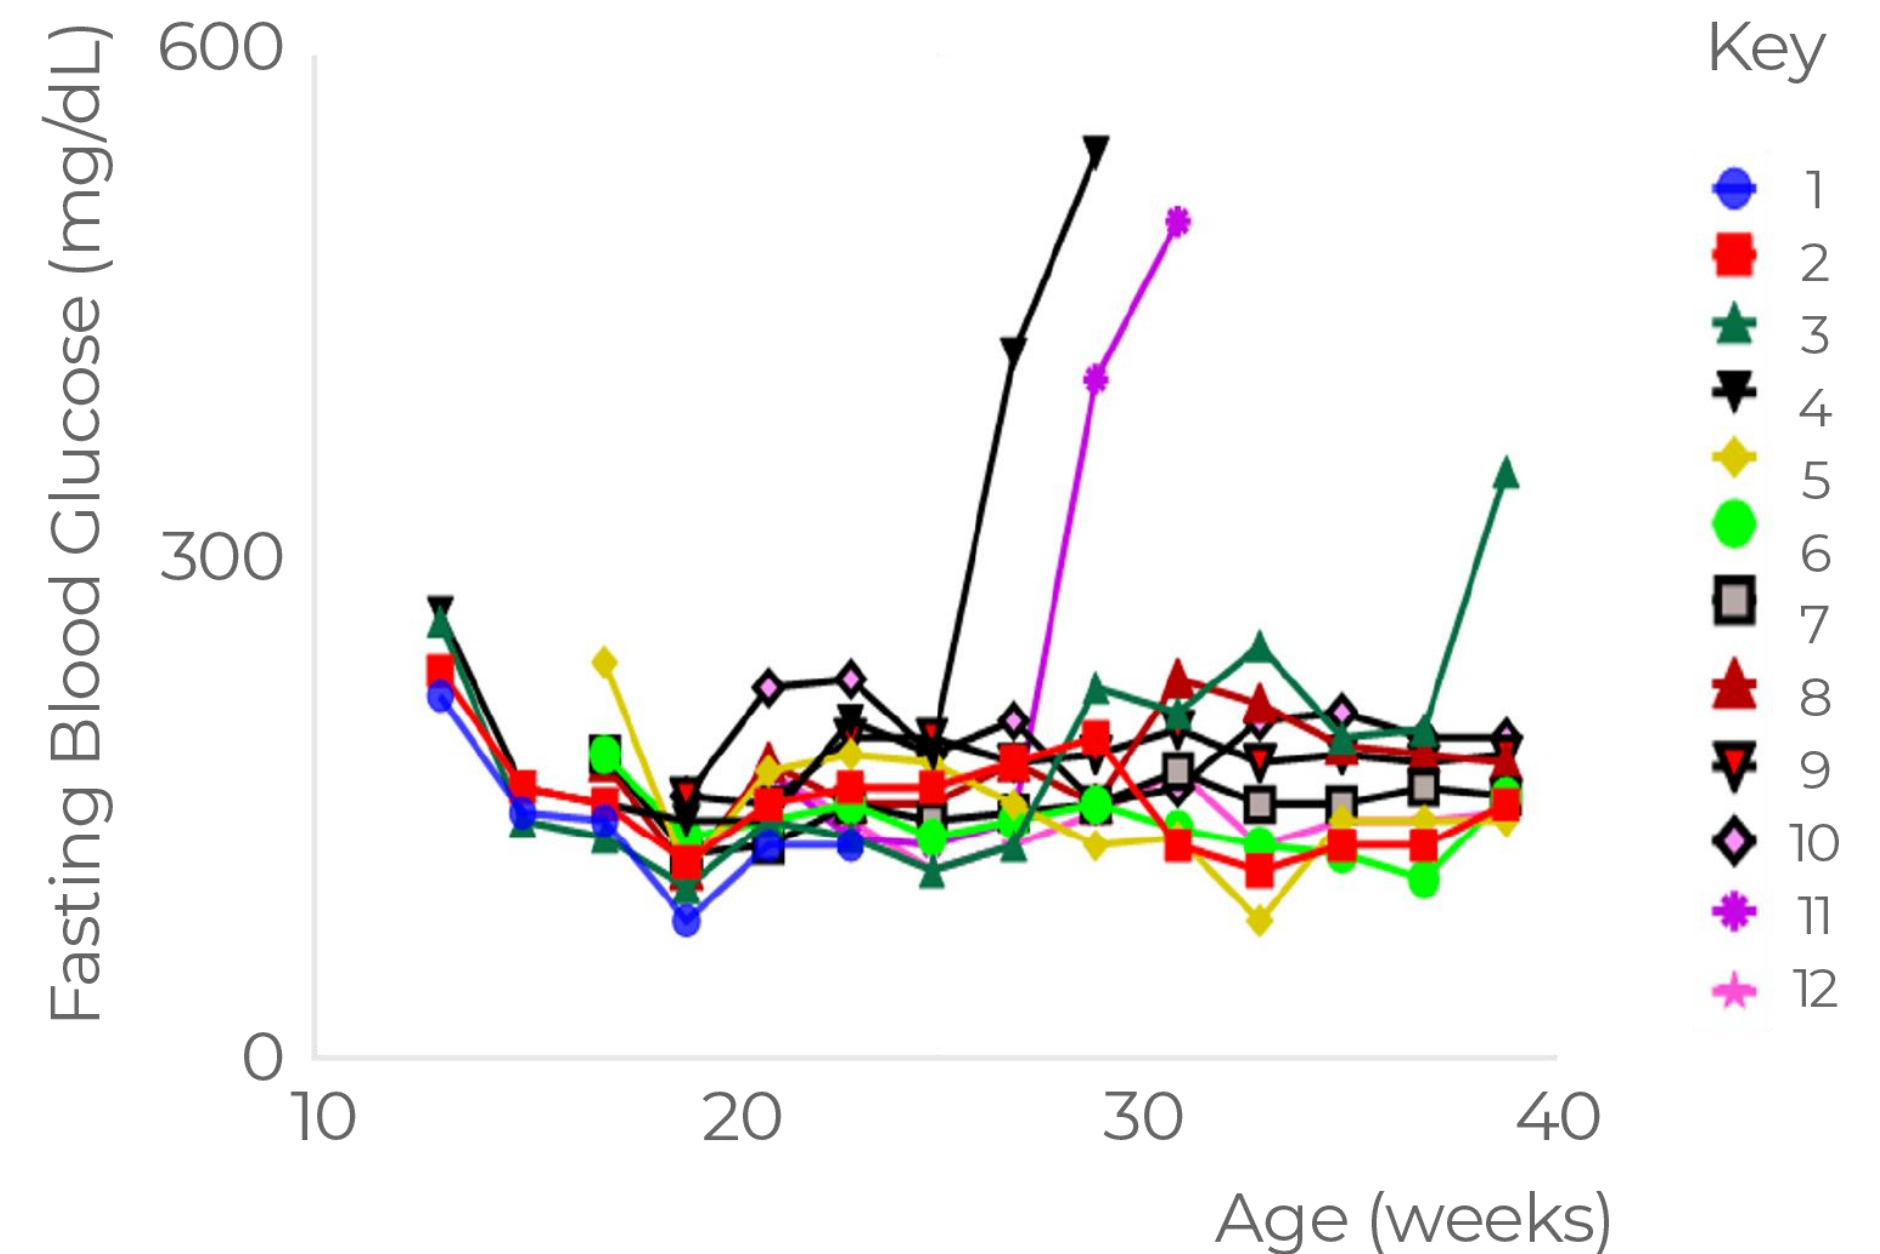

What is it?

The condition is triggered by the immune system attacking insulin-producing cells in the pancreas. As insulin allows glucose to move from our blood into our cells to produce energy, diabetes creates a build up of sugar in the blood and deprives the cells. It decreases life expectancy and can damage the heart, kidneys, eyes and feet.

Our treatment

Aditxt's solution aims to stop the precise immune system malfunction in its tracks, allowing the production of insulin. Immunotherapy that achieves this would be the first permanent cure for the disease. In initial trials our treatment restores insulin production and reverses hyperglycemia.

ADi Tx of NOD mice at >200 mg/dL

#1 Innovation

Skin Allografts

What is it?

The grafting of skin from one person to another, the donor often being dead, is often considered the best treatment for wound coverage, especially for victims with extensive burns. However, it is not permanent, and rejection is inevitable.

Our treatment

Aditxt's solution aims to increase the graft's longevity by a factor of three, improving each patient's quality of life and reducing the number of medical procedures required.
