LOW COST SILVER, GOLD & COPPER PRODUCER – A PROVEN MODEL FOR GROWTH

November, 2017

CAUTIONARY DISCLAIMER: FORWARD-LOOKING STATEMENTS

Safe Harbour Statement - This presentation contains "forward-looking information" and "forward-looking statements" (together, the "forward looking statements") within the meaning of applicable securities laws and the United States Private Securities Litigation Reform Act of 1995, including our belief as to the extent and timing of various studies including the PEA and exploration results, the potential tonnage, grades and content of deposits, and timing, and establishment and extent of resource estimates. These forward-looking statements are made as of the date of this presentation and the dates of technical reports, as applicable. Readers are cautioned not to place undue reliance on forward-looking statements, as there can be no assurance that the future circumstances, outcomes or results anticipated in or implied by such forward-looking statements will occur or that plans, intentions or expectations upon which the forward-looking statements are based will occur. While we have based these forward-looking statements on our expectations about future events as at the date that such statements were prepared, the statements are not a guarantee that such future events will occur and are subject to risks, uncertainties, assumptions and other factors which could cause events or outcomes to differ materially from those expressed or implied by such forward-looking statements.

Such factors and assumptions include, among others, the effects of general economic conditions, the prices of gold, silver, and copper, changing foreign exchange rates and actions by government authorities, uncertainties associated with legal proceedings and negotiations and misjudgments in the course of preparing forward-looking information. In addition, there are known and unknown risk factors which could cause our actual results, performance or achievements to differ materially from any future results, performance or achievements expressed or implied by the forward-looking statements. Known risk factors include risks associated with project development; the need for additional financing; operational risks associated with mining and mineral processing; fluctuations in metal prices; title matters; uncertainties and risks related to carrying on business in foreign countries; environmental liability claims and insurance; reliance on key personnel; the potential for conflicts of interest among certain of our officers, directors or promoters with certain other projects; the absence of dividends; currency fluctuations; competition; dilution; the volatility of our common share price and volume; tax consequences to U.S. investors; and other risks and uncertainties. Although we have attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. We are under no obligation to update or alter any forward-looking statements except as required under applicable securities laws.

Cautionary Note to United States Investors - The information contained herein and incorporated by reference herein has been prepared in accordance with the requirements of Canadian securities laws, which differ from the requirements of United States securities laws. In particular, the term "resource" does not equate to the term "reserve". The U.S. Securities and Exchange Commission's (the "SEC") disclosure standards normally do not permit the inclusion of information concerning "measured mineral resources", "indicated mineral resources" or "inferred mineral resources" or other descriptions of the amount of mineralization in mineral deposits that do not constitute "reserves" by SEC standards, unless such information is required to be disclosed by the law of the Company's jurisdiction of incorporation or of a jurisdiction in which its securities are traded. U.S. investors should also understand that "inferred mineral resources" have a great amount of uncertainty as to their existence and great uncertainty as to their economic and legal feasibility. Disclosure of "contained ounces" is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute "reserves" by SEC standards as in place tonnage and grade without reference to unit measures.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this presentation.

Mr. Jasman Yee, P.Eng (Avino Director) and Fred Sveinson P.Eng, (Senior Mining Engineer) are the Qualified Persons for the Company as required by NI 43-101. These qualified persons have reviewed the technical information concerning the properties contained in this presentation for accuracy and have authorized its disclosure. The Company expressly disclaims any obligation to update any forward-looking statements except as required under applicable securities laws.

AVINO AT A GLANCE – 2 MINES 2 COUNTRIES

- Two producing mines in Mexico (Avino and San Gonzalo)
- Plant and mine expansion in Mexico to increase throughput capacity by an estimated 70%
- Oxide Tailings Development Project - Avino
- Bralorne Gold Mine in BC, Canada – Development stage
- Eagle property option agreement between Avino & Alexco
Avino granted Alexco the right to acquire 65% in 14 quartz mining leases
- Mining friendly jurisdictions
- Diversified pipeline of gold, silver and base metals exploration properties (7)
- Experienced management team and Board of Directors

RICH IN HISTORY

- Avino – **49** Years in the Mining Industry

31 YEARS OF PRODUCTION HISTORY

- Specializing in re-opening past producers

AVINO AND BRALORNE

- Avino Mine – 500 years of history – a long tradition
- Bralorne – 100 years – Historic, prolific gold camp

Vista de la famosa Mina Avino—El Tajo mas largo cortado en el mundo—Estado de Durango.
View of the famous Avino—Largest Open Cut in the World—State of Durango.

LOCATION IS EVERYTHING – MEXICO AND CANADA

MEXICO - THE WORLD'S LARGEST SILVER PRODUCER

BRALORNE – ONE OF CANADA'S MOST PROLIFIC MINING OPERATIONS

STRONG LEADERS IN MANAGEMENT, FINANCIAL AND TECHNICAL EXPERTISE

DIRECTORS & OFFICERS

| | |
|--|--|
| Gary Robertson Chairman and Independent Director | 32 years experience in the financial industry, top financial planner at Hollis Wealth Advisory Services Inc. |
| David Wolfin President, CEO and Director | 30 years experience in mining and finance, geology, metallurgy, worked on the floor of the VSE and has lead a number of successful public companies. |
| Carlos Rodriquez, P.Geo Chief Operating Officer | 27 years technical experience in ore quality control and regional exploration, a graduate of the Colorado School of Mines in mineral exploration. |
| Malcolm Davidson, CPA, CA Chief Financial Officer | 13 years experience in financial reporting, compliance, corporate taxation and public accounting practice. |
| Jasman Yee, P.Eng Director, Project Manager and Metallurgist | 45 years technical experience as practical mineral processing engineer and a chemical Engineer graduate from UBC. |

DIRECTORS, FINANCIAL & TECHNICAL CONSULTANTS

| | |
|--|---|
| Ross Glanville, BASc, Peng, MBA, CGA, CAMV Independent Director | 46 years experience in mining, exploration and development in Canada and Internationally. Has worked with Wright Engineers, Giant Bay Resources and is well respected in the industry for his fairness opinions in the M&A space. |
| Michael Baybak, Director | 28 years serving as a Director of Avino. |
| Fred Sveinson, B.A., B.Sc., P.Eng Senior Mining Advisor - Bralorne | 45+ years experience as a professional mining engineer in the design, development, construction and operation of mines in Canada and internationally. He is currently working as an independent consultant and advisor to mining companies. |
| Andrew Kaplan Capital Market Strategist | 25 years experience in deal structures, M&A, trading and Investor Relations. |

SILVER EQUIVALENT² PRODUCTION GROWTH

CONSOLIDATED FINANCIALS

Effective January 1, 2017, the Company changed its presentation currency to US dollars from Canadian dollars. As a result, all dollar amounts are expressed in US dollars, unless otherwise noted.

AISC IN 2016 (US\$) – ASM CONTINUES TO RANK AMONG THE LOWEST COST SILVER PRODUCERS

Cash cost per ounce and all-in sustaining cash cost per ounce

Cash cost per ounce and all-in sustaining cash cost per ounce are measures developed by mining companies in an effort to provide a comparable standard. However, there can be no assurance that our reporting of these non-IFRS measures is similar to that reported by other mining companies. Total cash cost per ounce and all-in sustaining cash cost per ounce are measures used by the Company to manage and evaluate operating performance of the Company's mining operations, and are widely reported in the silver and gold mining industry as benchmarks for performance, but do not have standardized meanings prescribed by IFRS, and are disclosed in addition to IFRS measures.

CONSISTENT SILVER CASH MARGINS

CAPITAL EXPENDITURES – US\$109 MILLION³ SPENT SINCE 2011

■ PP&E Expenditures ■ E&E Expenditures

STRATEGIC PARTNER – SAMSUNG C&T

- Samsung C&T wanted to obtain raw materials at source with an ethical partner = Avino
- Avino mine concentrates sold exclusively to Samsung until December 31, 2021
- \$10 Million advanced to Avino as prepayment of concentrates
- Avino has repaid US\$1,333,332, net amount owing US\$8,666,668 (the 'Facility')
- Facility will be repaid with interest, payment deferral to July 2018 – July 2019
- Low Interest - LIBOR plus 4.75%

A steady long term contract for the sale of Avino's silver concentrate

2017/2018

OBJECTIVES & STRATEGY FOR VALUE CREATION AND GROWTH

Avino Mine - Mexico

- Mill expansion – Circuit #4, Increase by approximately 70% to 2,500 tpd
- Positive PEA delivered on the Oxide Tailings – follow through with next steps
- Tailings Storage Facility (TSF) - Revised internal operating plan underway
- 22 hole drill program completed at the Avino mine with new drill program targeting 3 areas of mineralization

Bralorne Gold Project – Canada

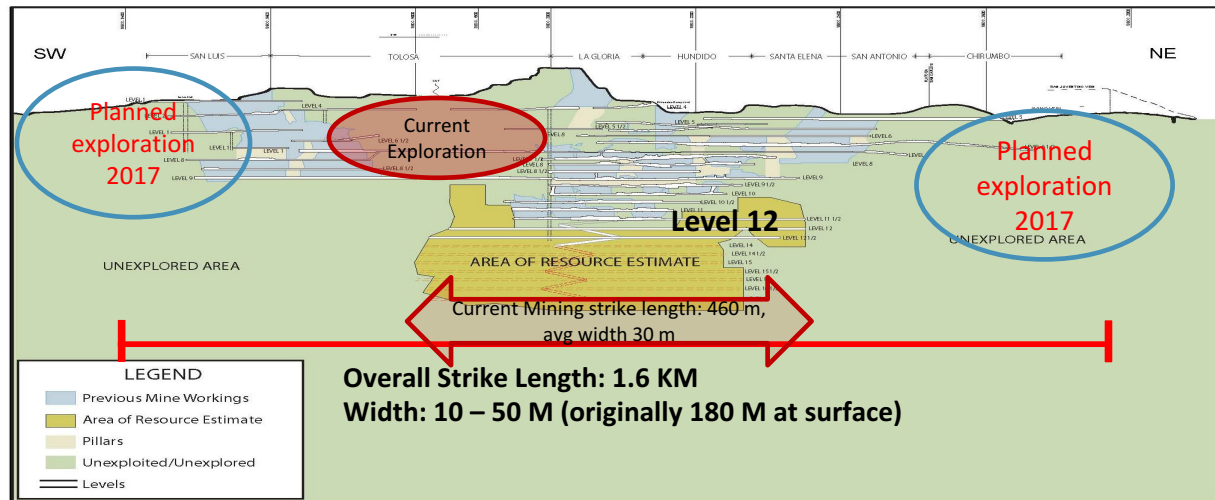

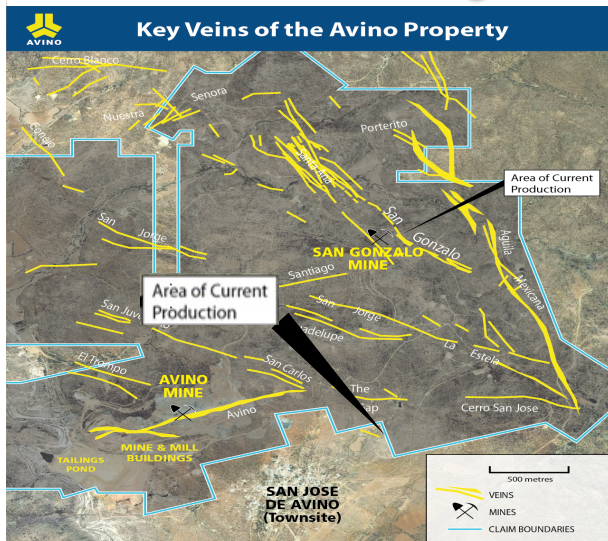

- Received Permit Amendment needed for expansion consideration
- Planning surface and underground drill program for the winter
- Using our resources to build better communities

GROWTH STRATEGY - AVINO PROPERTY UPSIDE

- Data from ongoing drilling and historic data are all currently being compiled
- Significant unexplored areas remain, Avino vein remains open at depth
- New gold rich area contains at least two sections with continuous significant gold assays

Drills turning on the Guadalupe Vein, El Chirumbo area and UG at Elena Tolosa

MILL EXPANSION WELL UNDERWAY – ESTIMATED COMPLETION Q1 2018

New Thickener tank

Circuit 4

Ore pass

New Electrical Substation

Conveyor

GROWTH STRATEGY – INCREASING RESOURCES

NI 43-101 COMPLIANT

| Resource Category | Deposit | Metric Tonnes |
|----------------------------|--|---------------|
| Total Measured | Avino System & San Gonzalo | 1,120,000 |
| Total Indicated | Avino System, San Gonzalo & Oxide Tailings | 2,150,000 |
| Total Measured & Indicated | All Deposits | 3,270,000 |
| Total Inferred | Avino System, San Gonzalo & Oxide Tailings | 8,140,000 |

** Complete Resource Estimate update table available on our website <http://www.avino.com/i/pdf/reports/TechReport-Avino-Final.pdf>*

LONG-TERM ORGANIC GROWTH STRATEGY

The effective dates for the resource estimates are August 31, 2016. Mineral Resources are reported at cut-off grades 55, 125 and 50 g/t silver equivalent grade for the Avino, San Gonzalo and oxide tailings respectively as indicated in the table. Silver equivalent cut-off grades were applied to satisfy the condition of reasonable prospects for eventual economic extraction and were calculated using conversion formulas $\text{AgEQ} = \text{Ag} + 55.9 * \text{Au} + 72.99 * \text{Cu}$ for Avino Vein, $\text{AgEQ} = \text{Ag} + 69.37 * \text{Au}$ for oxide tailings and $\text{AgEQ} = \text{Ag} + 56.38 * \text{Au}$ for San Gonzalo vein System. Cut-off grades were calculated using current costs, silver price of US\$19.50/oz, gold price of US\$1,250/oz and copper price of US\$2.10/lb.

The mineral resource estimates were prepared by Michael O'Brien P.Geo., Pr.Sci.Nat an employee of QG Australia Pty Ltd (an ARANZ Geo Company), who is independent of the Company, as defined by Section 1.5 of NI 43-101.

Note: Mineral resources which are not mineral reserves do not have demonstrated economic viability. The estimate of mineral resources may be materially affected by environmental, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues. The quantity and grade of reported Inferred resources in this estimation are uncertain in nature and there has been insufficient exploration to define these Inferred resources as an Indicated or Measured mineral resource and it is uncertain if further exploration will result in upgrading them to the Indicated or Measured mineral resource category.

POSITIVE PEA FOR THE OXIDE TAILINGS COMPLETED

ATTRACTIVE ECONOMICS

HIGHLIGHTS

- Pre-tax NPV 8% of US\$45M
- Pre-tax IRR of 48.4%
- 2 year pay-back period
- Total capex of US\$28.5 million
- 7 year mine life with LOM of 3.12 million tonnes of oxide tailings material

PEA BASE CASE

- Metal prices of \$18.50 oz silver, \$1,250 oz gold
- Operating costs – \$47M
- Operating Cash flow - \$95M
- Cash operating costs (US\$/oz Ag payable, net of Au credit) - \$2.21
- Capital Costs (US\$/oz Ag payable) - \$4.85
- Total Costs (US/oz Ag payable) - \$7.07

Next Steps:

Follow recommendations in Tech Report including the Pre-Feasibility stage

| Description | Value |
|------------------------------|-----------|
| Total Tonnes to Mill | 3,122,000 |
| Design Annual Tonnes to Mill | 500,000 |
| Plant availability | 90% |
| Mine Life (Years) | 7 |
| Average Grades | |
| Gold (g/t) | 0.43 |
| Silver (g/t) | 87.75 |
| Total Production | |
| Gold (ozs) | 33,000 |
| Silver (ozs) | 6,173,000 |
| Average Annual Production | |
| Gold (ozs) | 4,660 |
| Silver (ozs) | 881,920 |

BUILDING A FUTURE BRALORNE GOLD MINES – BRITISH COLUMBIA

Updated Resource Estimate

| | Measured | | | Indicated | | | Measured and indicated | | | Inferred | | |
|-------|----------|--------|-----------|-----------|--------|-----------|------------------------|--------|-----------|----------|--------|-----------|
| | Tons | Au opt | Au Ounces | Tons | Au opt | Au Ounces | Tons | Au opt | Au Ounces | Tons | Au opt | Au Ounces |
| Total | 45,922 | 0.36 | 16,643 | 227,201 | 0.32 | 74,885 | 273,123 | 0.33 | 91,528 | 363,527 | 0.22 | 83,900 |

Mineral resources which are not mineral reserves do not have demonstrated economic viability. The estimate of mineral resources may be materially affected by environmental, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues. The quantity and grade of reported Inferred resources in this estimation are uncertain in nature and there has been insufficient exploration to define these Inferred resources as an Indicated or Measured mineral resource and it is uncertain if further exploration will result in upgrading them to the Indicated or Measured mineral resource category.

The mineral resource estimate is classified in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum's "CIM Definition Standards - For Mineral Resources and Mineral Reserves" incorporated by reference into National Instrument 43-101 "Standards of Disclosure for Mineral Projects". Mineral Resources are reported at cut-off grades 0.1 ounces per ton gold.

MODERNIZATION, COMMUNITY AND GROWTH BRALORNE HIGHLIGHTS

- ✓ Amended modern permit received – **PROVIDES REQUIREMENTS REQUIRED FOR NEXT STEPS IN EXPANSION CONSIDERATION**
- ✓ Updated NI 43-101 Resource estimated – **INCREASED TONNAGE AND GOLD OUNCES**
- ✓ Permit applications to resume mining and processing – **ROAD TO PRODUCTION**
- ✓ Long-hole mining to be tested – **COST EFFECTIVE**
- ✓ 2 new scoop trams, jumbo drill and a rock breaker – **MODERNIZING THE MINING FLEET**
- ✓ Deposit on new larger ball mill
- ✓ Purchase of new portable crushing plant
- ✓ Water treatment capability increased – **NEW MICROFILTRATION WATER TREATMENT**
- ✓ Upgrading above ground infrastructure – **FIRST AID & WOMAN'S DRY FACILITIES**
- ✓ Investment in education and training for local First Nations communities
– **PARTNERING WITH THE COMMUNITY AND BUILDING A MUTUALLY BENEFICIAL FUTURE**

Tailings Dam embankment raise

2 new scoop trams

Taking all steps towards environmental responsibility

CORPORATE SOCIAL RESPONSIBILITY

ACTIVE ENGAGEMENT WITH FIRST NATIONS

- In 2016, Bralorne, North Island College, the BC government and First Nations completed two educational cohorts to provide basic mining training to 24 members of the St'at'imc First Nation in Lillooet
- Currently planning the third educational training program
- Maintaining open lines of communications with First Nations communities
- Working collaboratively with First Nations on mine closure and reclamation plan, water quality and regional economic development

**Working with the community to
build a successful labour force skilled
in mechanized mining**

First group of graduates from the
mining training

INVESTMENT CASE

Quality Core assets

- People – low turnover rate
- Junior silver-gold-copper miner focused on growth
- A long and valued history
- Operating in Canada and Mexico

Low cost producer

- Consistent producer
- Proven track record
- Controlled and maintained our AISC

Growth Potential

- Pipeline of organic growth opportunities
- Extensive exploration potential at Avino and San Gonzalo mine
- Evaluating start-up scenarios

APPENDIX FOOTNOTES

1. Cash cost per ounce and all-in sustaining cash cost per ounce

Cash cost per ounce and all-in sustaining cash cost per ounce are measures developed by mining companies in an effort to provide a comparable standard. However, there can be no assurance that our reporting of these non-IFRS measures is similar to that reported by other mining companies. Total cash cost per ounce and all-in sustaining cash cost per ounce are measures used by the Company to manage and evaluate operating performance of the Company's mining operations, and are widely reported in the silver and gold mining industry as benchmarks for performance, but do not have standardized meanings prescribed by IFRS, and are disclosed in addition to IFRS measures.

Management of the Company believes that the Company's ability to control the cash cost per silver equivalent ounce is one of its key performance drivers impacting both the Company's financial condition and results of operations. Achieving a low silver equivalent production cost base allows the Company to remain profitable even during times of low commodity prices, and provides more flexibility in responding to changing market conditions. In addition, a profitable operation results in the generation of positive cash flows, which then improves the Company's financial condition.

The Company has adopted the reporting of "all-in sustaining cash cost per silver equivalent ounce". This measure has no standardized meaning throughout the industry. However, it is intended to provide additional information. Avino presents all-in sustaining cash cost because it believes that it more fully defines the total current cost associated with producing a silver equivalent ounce. Further, the Company believes that this measure allows investors of the Company to better understand its cost of producing silver equivalent ounces, and better assess the Company's ability to generate cash flow from operations. Although the measure seeks to reflect the full cost per silver equivalent ounce of production from current operations, it does not include capital expenditures attributable to mine expansions, exploration and evaluation costs attributable to growth projects, income tax payments, and financing costs. In addition, the calculation of all-in sustaining cash costs does not include depreciation and depletion expense as it does not reflect the impact of expenditures incurred in prior periods. The Company's calculation of all-in sustaining cash costs includes sustaining capital expenditures of \$nil as substantially all of the mining equipment used at San Gonzalo and at the Avino stockpiles has been newly purchased or refurbished. The Company has planned for sustaining capital expenditures in future periods in accordance with mine operating plans and expected equipment utilization levels. Calculated figures may not add up due to rounding

2. Silver Equivalent Ounce Calculation

Metal Production is expressed in terms of silver equivalent ounces, (oz Ag Eq.), the formula for which depends on the gold and silver metal prices used in each year and hence are only indicative.

Silver equivalent ounces sold consists of the number of ounces of silver sold plus the number of ounces of gold sold multiplied by the ratio of the average spot gold price to the average spot silver price for the corresponding period.

Metals Prices used to calculate Ag Eq. are as follows: 2012 (\$1700Au, \$34ag), 2013 (\$1300Au, \$20ag), 2014 (\$1300Au, \$20Ag), 2015 (\$1150Au, \$16Ag, \$3 Cu) . In 2016, AgEq was calculated using metals prices of \$17.10 oz Ag, \$1,248 oz Au and \$2.21 lb Cu.

3. USD Exchange Calculation

Cash in U.S. dollars at March 31, 2016 has been translated at the spot rates for USD-MXP and USD-CAD on that date. Cash cost per ounce, all in sustaining cash cost per ounce, and capital expenditures have been translated at average rates of USD-CAD currency exchange for the periods presented.
